Skills

HTML | CSS | ReactJS | NextJS | Material UI | Bootstrap | Semantic UI | ExpressJS | NodeJS | Javascript | C++ | Python | MongoDB | Firebase | Firebase | PassportJS | Cypress.io | SQLite | Google App Engine

Work Experience

Alnakheel Magazine

October 2020 - Present

Web Developer alnakheel.org

- Developed the public website and admin panel for the editors of Alnakheel Magazine to add and edit articles using ReactJS/NextJS, Firebase and hosted on vercel

Aomni app.aomni.com

October 2020 - February 2021

Software Development Intern

- Implemented testable frontend code with ReactJS/NextJS
- Conducted end to end using reusable Cypress.io tests and fixed bugs discovered during testing.

New York University Abu Dhabi Undergraduate Admission Office

Senior Student Admissions Ambassador

August 2020 - Present

- Implemented an automated system for admissions staff to request for student ambassadors to support events via Google forms, Google Sheets and GScript
- Developed an independent event management system using ReactJS/NextJS, using Firebase as the backend for use by 20 student ambassadors, 20 staff members to facilitate about 50 event requests per academic year
- Implemented a notification system for the event management system using Sendgrid Email API
- Implemented event scheduling on Google Calendar using Google Calendar API
- Developed an independent system for event engagement management where staff can request for student ambassadors to support events via Google Forms, student ambassadors can sign up via a user interface and the student ambassador supervisor can confirm assignments which can then be logged as a Google Calendar event

Scholars Abroad Fiji

July 2020 - Present

Co-Founder, Web Developer <https://scholarsabroadfiji.com>

- Co-founded Scholars Abroad Fiji a mentorship network that assists current Fijian high school students to apply to international universities that offer full scholarship
- Developed a public website using ExpressJS, MongoDB and NodeJS
- Implemented contact page by using Nodemailer to send an email to mentorship team
- Hosted app on Google App Engine

Projects

NYUAD Challenges

- Developed a protected app for students to view, attempts challenges and use points to purchase items from the store using ReactJS/NextJS as the frontend framework and Firebase for Authentication, Database and Storage and hosted on Vercel
- Developed a protected dashboard for challenges admin to create new challenges, approve or reject submissions and add items to the store

Assassin Game Portal

- Developed a dashboard for the annual Assassin Game at NYU Abu Dhabi using NextJS/ReactJS that was used by 155 students over a period of 5 weeks, with 0 downtime on the system
- Created a daily CRON job to automate the elimination of players that did not meet a certain criteria and changing the phrase of the day
